

The Town of Newbury is now approved for the new Knox Box Program: Knox Home Box

The Knox Box Program, which many Newbury residents use for a secure way for Newbury Fire Rescue to access their property in an emergency such as a fire alarm activation, has a new program specially for single family residences called KnoxHome Box. The new boxes specially keyed for Newbury Fire Rescue can be ordered on their new website: <https://www.knoxhomebox.com/>. The Newbury Fire Department is notified by the Knox Company when a box is ordered for a property in Newbury and a fire official will assist in installing the box in a location that is convenient for the property owner and the fire department.

Knox Boxes enable the Newbury Fire Department to access a property in the event of a fire alarm when no one is at home to verify that there is no smoke or fire, without damaging expensive doors or windows. The cost of the box is considerably less than the cost to replace or replace a door or window. The only key to the Knox Boxes are secured in a special locked and recorded security box on the fire apparatus and can only be accessed by authorized fire department members. New commercial, multi-family (4+), seasonal residences and gated properties are required to have a Knox Box as part of the building permit process. Owners of existing seasonal as well as year round homes are encouraged to install a Knox Box.

Details on the Knox HomeBox program and the on-line application can be found on the attached Knox HomeBox brochure.

Introducing our latest Rapid Access System for the Homeowner

Knox® HomeBox™ ... *When Seconds Matter™*

Knox® HomeBox™ single key vault provides homeowners with the same secure rapid access system that currently protects hundreds of thousands of government and commercial properties in over 13,500 fire jurisdictions across North America for over 40 years. When lives, safety and property matter, a Knox HomeBox can make all the difference. When seconds matter, count on Knox.

Tactical Advantages

- Reduces risk of injury to responding personnel
- Helps enter property quickly
- Reduces property damage
- Makes re-securing accessed property reliable, easier and faster

Practical Advantages

- Utilizes the highly secure Knox proprietary key system that is already in place for commercial buildings in your municipality, therefore no additional keys to secure or manage.
- Electronic email notification of purchase provided to Knox Program Coordinator upon shipment, installation report data provided via secure login at Knoxbox.com.
