## THE NEED FOR A NEW FIRE STATION

The existing station has served the Town of Newbury admirably for the past half a century, but, unfortunately, it no longer meets the needs of today's firefighting and emergency response requirements.

In the past decade, there have been 4 studies, several visioning sessions, numerous public input sessions, and land has been purchased with safety services in mind. In every study, the result has been the same, the Town of Newbury needs a new fire station.

The current station:

- Lacks adequate floor space for even our current equipment.
- Has inadequate headroom and door size for current firefighting equipment.
- Does not protect firefighters from hazardous substances and vehicle exhaust.
- Requires that fire trucks be "stacked". Fire trucks near the doors must be moved before rear trucks can respond.
- Requires maneuvering and backing up on NH Rt. 103 in a potentially dangerous manner.
- Places fire personnel and equipment within inches of each other in a dangerous arrangement.

Thank You!

A New Fire Station For Newbury New Hampshire
